

ImmunXperts, Gosselies, Belgium Flow Cytometry Specialist

Should you consider yourself to be among the best scientists or analysts in town, here is your chance to participate in the daily life of the most successful advanced testing service provider in the immunology field. ImmunXperts, a Nexelis Group Company, is a high-potential CRO based in Gosselies, Belgium. This fast-growing company offers a wide range of Immunology services with a strong commitment to developing customized solutions for its clients. The offerings include in vitro assays to assess the immunogenic potential of test molecules using T cell activation and proliferation assays as a surrogate marker for the induction of Anti-Drug-Antibodies. On the immuno-oncology side, ImmunXperts develops in vitro assays to assess the functionality of candidates. ImmunXperts continuously develops new cellular immune-assays to assist biotech and pharma companies directly in their product development. Other such collaborative services include protocol optimization and in-house training. More info can be found on www.immunxperts.com

In this key position, you would:

- Develop & Manage the various operational aspects of a multi-instrument flow cytometry facility.
- Design multi colors panels (up to 18 colors) for a wide range of applications.
- Track performance of flow cytometers and take corrective actions, if needed.
- Oversee FACS-related reagents stock management.
- Be responsible for all-FACS related SOPs and documentation.
- Analyze flow data and participate in the writing of technical and scientific reports.
- Support your colleagues in budgeting flow cytometry related work.
- Guide, train and support your colleagues to ensure quality work is delivered on budget and on time.
- Reinforce and implement quality standards through continuous improvement strategies

Requirements:

- You hold a PhD or Master's degree in Biology or Life Sciences, or equivalent.
- You have at least 3 to 5 years of experience in implementing flow cytometry assays, designing panels, and performing analysis.
- You demonstrate a good knowledge of FlowJo.
- You are analytical, rigorous, detail-oriented, autonomous, committed, and flexible.
- You have strong team spirit and excellent interpersonal skills.
- You have good oral and written communication skills in English and French.

ImmunXperts, Gosselies, Belgium Flow Cytometry Specialist

- You have good knowledge of MS Office (outlook, Word, Excel).
- Other elements that are certainly a plus:
 - Previous experience using Flowlogic analysis software.
 - Hands on experience on BD LSRFortessa and MACSQUANT 10.
 - Reagents inventories and orders management.
 - Experience working with customers and service providers

If this position is for you, just submit your CV and we will contact you soon.

About Nexelis

With unrivaled expertise in immunology, and operating sites in North America (East and West Coast) and Europe, Nexelis is a leading provider of assay development and advanced laboratory testing services in the infectious diseases, metabolic diseases, and oncology fields. Our versatile team of scientists, working with our advanced technology platforms, were instrumental in the development, qualification, validation, and large-scale sample testing of assays that supported the FDA filing of almost 100 new molecular entities, including blockbuster vaccines, anti-viral drugs, and immunotherapy, gene and cell therapy products. www.nexelis.com

About ImmunXperts

ImmunXperts offers a wide range of in vitro immunology services with a strong focus on immunogenicity and immuno-oncology. The company helps biopharma companies select their best lead candidates by assessing all aspects of immune responses in donors and patients. Acting as a mobile development team, ImmunXperts complements its clients' expertise to deliver meaningful and potent screening tools. For more information, please visit www.immunxperts.com
